

## Accelerating Your Data Migration

### Highlights

- **End-to-End data migration service**
- **Data security and quality checks**
- **Can be used to seed pre-prod environments**

### Overview

Legacy database systems often include proprietary and sometimes complex datatypes to store your data. Migrating your data to Aerospike requires a comprehensive data strategy to ensure the right data is identified and securely loaded into Aerospike.

Aerospike's team of experts will analyze your existing datastores and leverage our tools to build a system of maps and transformations needed to move to an Aerospike data model. Our ETL process includes a series of data quality checks to validate the transformations and ensure the integrity of your data.

### Benefits

The Data Migration Package scales to fit the size of your project.

#### Understand Your Data Footprint

The number of data objects and the size of those objects can shift over time. Our analysis will provide you with a clear understanding of the data you are storing so you can ensure you are maximizing the use of your data to advance your business objectives.

#### Accelerate Production Schedule

Decrease your time-to-market by leveraging Aerospike's expertise in working with data stored in legacy systems.

#### Ensure Data Quality and Data Integrity

Data that is incorrectly identified or incorrectly transformed will derail your business success. We will design and run data quality checks to validate the integrity of your data.

#### End-to-End Service

Aerospike consultants will identify a migration strategy that fits your needs and will execute the strategy the completes with a validation cycle.

#### About Aerospike

Aerospike is the global leader in next-generation, real-time NoSQL data solutions for any scale. Aerospike enterprises overcome seemingly impossible data bottlenecks to compete and win with a fraction of the infrastructure complexity and cost of legacy NoSQL databases. Aerospike's patented Hybrid Memory Architecture™ delivers an unbreakable competitive advantage by unlocking the full potential of modern hardware, delivering previously unimaginable value from vast amounts of data at the edge, to the core and in the cloud. Aerospike empowers customers to instantly fight fraud; dramatically increase shopping cart size; deploy global digital payment networks; and deliver instant, one-to-one personalization for millions of customers. Aerospike customers include Airtel, Banca d'Italia, Nielsen, PayPal, Snap, Verizon Media and Wayfair. The company is headquartered in Mountain View, Calif., with additional locations in London; Bengaluru, India; and Tel Aviv, Israel.
